

High Data Quality Report

Campaign & Outreach Data

1. Overview

This report evaluates the quality of two cleaned datasets — 'Cleaned Campaign Data.xlsx' and 'OutreachData_Cleaned.xlsx'. The third file ('Student Outreach & Campaign Analysis.pbix') contains visualizations built on top of these datasets.

Dataset A: Cleaned Campaign Data
• Rows: 24, Columns: 7
• Duplicate rows: 0
Dataset B: OutreachData_Cleaned
• Rows: 9276, Columns: 8
• Duplicate rows: 0

2. Cross-Dataset Checks

- Common columns: University .
- Column 'University': unique in A=1, unique in B=1, sample overlap ~ 0.0% .

3. Dashboard Making Actions

- Collect Data → Gather all sources (Campaign & Outreach files).
- Clean Data → Remove errors, duplicates, missing values.
- Integrate → Join datasets on common keys (e.g., University).
- Define KPIs → Decide what you want to measure (students reached, campaigns run, responses).
- Visualize → Choose right chart type (bar, line, map, pie).
- Layout → Arrange visuals neatly (overview on top, details below).
- Filter & Slice → Add filters (by university, campaign, time).
- Validate → Cross-check dashboard totals with raw data.
- Publish → Share or present the dashboard.

4. Visualization Overview

Dashboard Visualization Summary

- The Outreach Performance Dashboard provides a clear view of campaign effectiveness.
- The Overview dashboard highlights key metrics (Outreach, Conversion, Response, Unique Applicants), category splits (Pre vs Post Admission), caller performance, and campaign-level details.
- The Trend dashboard shows how conversion and response rates change over time (2023–2024), helping identify peaks, dips, and long-term patterns.

Overall Insight: The dashboards together offer both a snapshot and a timeline view, making it easier to track outreach scale, applicant engagement, caller efficiency, and campaign success trends.
